### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 7, 2004 has been entered.
2. Claims 1, 2, 12, 15, 16, 23, 25, and 27 have been amended. Claims 1-31 are pending in this case.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-14 and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moore (US5,917,925A) in view of Racanelli (4,511,793) further in view of Liechti et al (US 5,715,164A).
6. Regarding claim 1-6, 9-10 and 27-30:

Art Unit: 3621

Moore discloses scanning mail throughout the mail processing system in order to detect mail fraud (e.g. col 3 ln 58-col 4 ln 20).

7. Regarding claims 12-14 and 28 –

Racanelli discloses the accumulation of the amount of postage dispensed/used for a particular amount (e.g. col 1 ln 47-60).

8. Regarding claims 11-14 and 28-30 –

Liechti discloses the centralized collection of postage used data/information for a plurality of postage meters (e.g. col 1 ln 54 – col 2 ln2).

9. It would be obvious to one of ordinary skill in the art to combine the teachings of Moore, Racanelli and Liechti in order to obtain greater efficiency in the detection of mail fraud.

10. Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant.

Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may be applied as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention as well as the context of the passage as taught by the prior art or disclosed by the examiner.

### ***Conclusion***
